

MUKUND KAPADIA

Full Stack Developer

437-249-2900 mdrkkapadia@gmail.com

mukundkapadia.me | linkedin.com/in/mukund1987 | github.com/mukund-2114

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python

Front-end: NextJs, React, Tailwind

Back-end: Node.js, Express.js

Databases: MongoDB, MySQL

Libraries: Acertinity UI, Shadcn/ui

Developer Tools: Git, Github, Postman

EXPERIENCE

Full Stack React Developer

BrainyBeam Infotech Pvt. Ltd

Jan 23 - Oct 23

Ahmedabad, India

- Delivered comprehensive React training to internship students, focusing on best practices, component-based architecture, and state management.
- Implemented responsive and user-friendly UI components, improving overall user experience.
- Designed and developed RESTful APIs to support various features of the application.
- Collaborated with the design team to create visually appealing and intuitive interfaces.
- Integrated third-party APIs to enhance the functionality of the application.

PROJECTS

TradeVault : Trading Journal | *Next.js, Node.js, MongoDB, Shadcn, Acertinity UI*

In Progress

- Developing a comprehensive web application for trading journal and portfolio management in collaboration with a friend. The application will enable users to log trades, track performance, manage their portfolio, and generate detailed reports.
- Integrating features for trade entry management, portfolio tracking, and data visualization. Implementing a responsive and intuitive interface using Shadcn and Acertinity UI libraries.
- Planning to integrate an API from a trading exchange to provide real-time data and automated trade logging.

Cellphone Store (Group Project) | *React, Node.js, PL/SQL, TailwindCSS*

Mar 24 - Apr 24

- Developed a comprehensive web application for a cellphone store as part of a college group project. Utilized React for the front end, Node.js for the back end, and MongoDB for database management.
- Applied PL/SQL to implement complex database functionalities, including procedures, functions, triggers, indexes, and sequences.
- Enabled users to browse, search, and purchase cellphones, view detailed product information, and manage their accounts. Integrated PL/SQL to optimize backend operations and streamline transaction processes.
- Worked collaboratively with team members to design and develop the application, contributing to both frontend and backend development while focusing on advanced database solutions.

Airbnb Clone Web Application | *React, Node.js, MongoDB, TailwindCSS*

Sept 23 - Oct 23

- Developed an Airbnb-like application that allows users to search for, book, and review rental properties. Included features like secure payment integration via Razorpay and an admin panel for managing listings and bookings.

- Gained hands-on experience with both frontend and backend technologies, including React for dynamic UI, Node.js for server-side logic, and MongoDB for database management. Integrated payment processing with Razorpay and created an admin panel for overseeing user interactions and reservations.
- Enabled users to efficiently browse and book properties, with secure payment options and comprehensive administrative tools for managing the application.

EDUCATION

Centennial College

Software Engineering Technician

Scarborough, ON

2024 - Present

Marwadi University

Bachelor's of Technology in Computer Engineering

Graduated with 8.7 CGPA (85%)

Rajkot, India

2019 - 2023

CERTIFICATIONS

Postman API Fundamentals Student Expert - Canvas Credentials

Issued May 2024

Career Essentials in Software Development by Microsoft and LinkedIn

Issued Feb,2024

Google IT Support Specialization - Coursera

Issued May,2023
